

## ***XL PLUS Icons***

What do all those different icons mean on the Watcher XL PLUS System? Here's a visual dictionary of what purpose those icons serve.

### Split View Icon

Click on this icon to change how many cameras are displayed in the window. 1 View = 1 Camera, 4 View = 4 Cameras, etc.

### Settings Icon

Click on this icon to access the System Settings menu. This menu includes general, NTP, DST, reboot, network, record schedule, log color, exception, and RAID settings. The System Setting also includes the user management menu.

### Playback Icon

Click on this icon to view recordings, make backups, and capture screen shots.

### Group View and Settings Icon

Click on this icon to create and/or change the group view in the window. In this menu, cameras can be assigned to groups.

### Manual Record Icon

Click on this icon to start and stop manual recordings.

### Channel Setting Icon

Click on this icon to change the settings on individual cameras. This menu includes display, video, motion detection, privacy mask, alarm input, PTZ, and linkage settings.

### Device Management Icon

Click on this icon to add, delete, and/or modify view cameras on the network.

### Lock Screen Icon

Click on this icon to toggle locking and unlocking the screen.

### Power Icon

Click on this icon to display the Power Management options. Logout, restart, and shutdown the system from this menu.

### Disk Used Icon

This icon displays that the selected hard drive is partially full.

### Disk Full Icon

This icon displays that the selected disk is full.

### Disk Empty Icon

This icon displays that the selected disk is empty.

### Disk Formatting Icon

This icon displays that the selected disk is being formatted.

### Disk Writing Icon

This icon displays that the selected disk is being written to.

### Disk Error Icon

This icon displays that the selected disk is encountering an error.

### Running Man Icon

This icon displays that the selected camera is set to record motion.

### Clock Icon

This icon displays that the selected camera is set to record on a schedule or full time.

### Manual Recording Icon

This icon displays that the selected camera is set to manual recording.
